

For Visitors to RENOVA: A Guide to Reach RENOVA Office

Prior reception procedures are required to reach the office floor of the Kyobashi Edogrand building, where RENOVA is housed. We will issue a six-digit entry code in advance. Enter the code on the visitor reception machine at the office entrance on the third floor of the building.

From Kyobashi Station (G-10) on Tokyo Metro Ginza Line

Walk through the Meijiya District Gate and head toward Exit 8.

The gate is on the first basement floor. Take the escalator to the ground level.

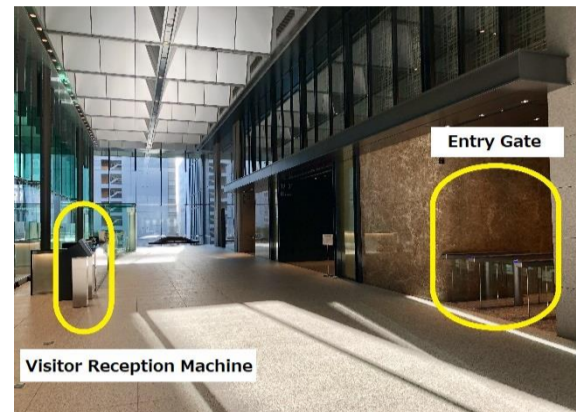

From the ground level

Take the escalator located at the center of the building to the third floor.

The visitor reception machine is located in the center of the office entrance.

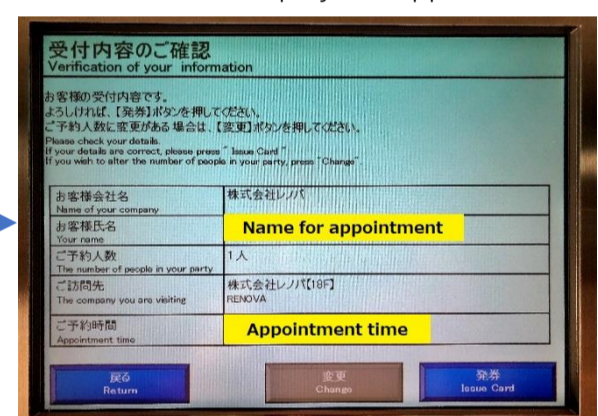

Obtaining a ticket from the machine

Enter the six-digit code issued at the time of making an appointment using the touchscreen panel.

The screen will display the appointment details.

* Press the "Change" button, to amend the number of people to be given access within the number of persons listed for the appointment.

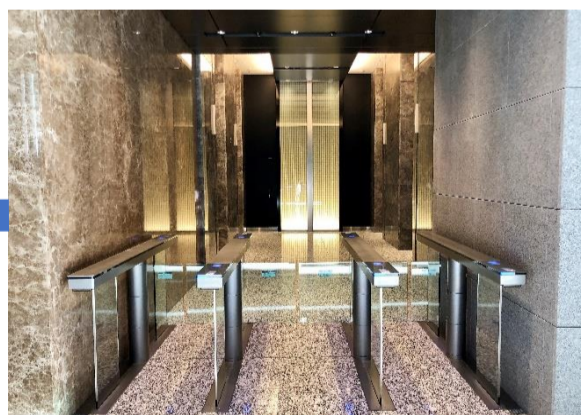

The machine will issue entry cards with the same code until the number of cards issued matches the number of people listed for the appointment.

Use this function if anyone in the group arrives late.

Use the telephone at the reception desk to call our relevant personnel.

The gate to the 13th to 18th floors is found on the side opposite to the machine. Allow the QR code (2D code) to be scanned by the reader on the gate and then proceed to the 18th floor.

Press the "Issue Card" button, and a card will be dispensed from the lower part of the machine.
