### **Notice Concerning Impact of Typhoon Faxai**

RENOVA, Inc. expresses its support and solidarity towards those who have recently been impacted by Typhoon Faxai.

We have confirmed that Typhoon Faxai, which passed through Tokai, Kanto, and Tohoku on September 8 and 9, 2019, has not caused any material impact on the assets of our group's large-scale solar power plants and biomass power plants, operating or under construction.

However, we have confirmed that the power grid of TEPCO Power Grid, Inc. is experiencing problems, so we are not transmitting electricity from the Futtsu Solar Power Plant (Futtsu, Chiba Prefecture; generation capacity of 40.4 MW) as of September 9. After investigating the situation in detail, we will announce any further action separately. We have been selling electricity from the other large-scale solar power plants as usual.

If any new damage occurs in the future, we will immediately make another announcement.
