Notice Concerning Impact of Earthquake occurred in centered off the coast of Fukushima Prefecture

RENOVA, Inc. expresses its support and solidarity towards those who have recently been impacted by the earthquake that occurred in centered off the coast of Fukushima Prefecture at about 23:08 on February 13, 2021.

We have confirmed that this earthquake has not caused any damage that would have a material impact on our operating and under construction large-scale solar PV plants and biomass plant in Tohoku and Kanto regions, which also confirmed that we have sustained no damage that would have a material impact on our other power plants under development.

If any new damage or similar development occurs in the future, we will immediately make another announcement.
