

Creating our future with renewable energy.

June 1, 2021

RENOVA, Inc.

**Our CEO Yosuke Kiminami presented as a panelist in 2nd P4G Summit,  
public and private network towards Green Growth and the Global Goals 2030**

The second summit for [“Partnering for Green Growth and the Global Goals 2030 \(P4G\)”](#), hosted by the Government of Republic of Korea, was held on 30th and 31st May and CEO Yosuke Kiminami from RENOVA, Inc. has presented as one of the panelists in “A Greener Planet with Innovative Energy Solutions” session.

P4G is the international public and private network supporting investments in innovative business models in developing countries to pursue sustainable and inclusive growth, funded by 12 partner countries including Denmark and Republic of Korea. The first summit was held in Denmark October 2018. Second summit was hosted by Republic of Korea and was broadcasted online due to COVID-19.

Kiminami participated as one of the panelists for the session [“A Greener Planet with Innovative Energy Solutions”](#) hosted by Korean Ministry of Trade, Industry and Energy. He presented his passion and RENOVA's technical capability to develop renewable energy projects in Asia, valuing philosophy to reach “Mutual Success” with local community and co-working relationship with local employees and partners who share the goal.

RENOVA, as leading company for energy transition in Asia, will continue to contribute to decarbonization and local community.
