Notice Concerning Impact of Instructions on Output Control on Renewable Energy Power Plants from Kyushu Electric Power Co., Inc. on Renova's Power Plants

RENOVA Inc. (hereinafter the "Company") announces that power generation was suspended on October 20, 2018 at its Ozu Solar Power Plant (Ozu-machi, Kikuchi-gun, Kumamoto Prefecture; Capacity: 19.0 MW) and on October 21 at its Kokonoe Solar Power Plant (Kokonoe-machi, Kusu-gun, Oita Prefecture; Capacity: 25.4 MW) as detailed below, following instructions on output control from Kyushu Electric Power Company, Inc. on the said dates.

RENOVA's consolidated earnings forecast was formulated and announced, with the impact from output control taken into consideration. The recent output control has a minor impact on the consolidated forecasts for the fiscal year ending March 31, 2019.

1. Solar Power Plants Subject to Output Control and Suspended Operations

| Date | Solar power plant | Output control details |
|----------------------|---------------------------|--|
| Saturday, October 20 | Ozu Solar Power Plant | All power conditioner systems (hereinafter "PCSs") at the plant were suspended from 9:00 a.m. to 4:00 p.m. that day. All the PCSs were restarted at 4 p.m. on the day. The plant was not subject to output control on Sunday, October 21. |
| Sunday, October 21 | Kokonoe Solar Power Plant | All PCSs at the plant were suspended from 9:00 a.m. to 4:00 p.m. that day. All the PCSs were restarted at 4:00 p.m. on the day. The plant was not subject to output control on Saturday, October 20. |

2. Impacts on RENOVA's Financial Results

As a result of the recent output control, power generation declined 0.1% compared to the planned full-year figures for electricity sales of all solar power plants operated by RENOVA. In the process of setting planned full-year figures for electricity sales, RENOVA takes into account some output control risks as well as risks arising from continual rains and other climate events. The output control has a minor impact on the consolidated forecasts for the fiscal year ending March 31, 2019.

3. Other

The solar power plants operated by RENOVA in areas served by other electric power companies consistently sold electricity.
