This document has been prepared to provide corporate information and other details about RENOVA, Inc (“RENOVA,” hereafter) and the RENOVA Group, and does not constitute solicitation to acquire shares or other securities issued by RENOVA, whether in Japan or overseas.

Information listed herein concerning industry and market trends, the economic climate and so on has been prepared based on currently available information. RENOVA does not guarantee the veracity, accuracy, reasonableness or completeness of the information and assumes no obligation to update the particulars of any information.

Moreover, RENOVA Group plans, forecasts, estimates, predictions and other forward-looking information described herein represent only the current determinations or ideas of RENOVA. Actual RENOVA Group operating results, financial status and other outcomes may diverge considerably from the details described herein and the estimates made on that basis due to a variety of factors including trends in energy policy, legislation, schemes, markets and other institutions in Japan and overseas, the status of licenses and permits required for RENOVA Group projects, success or failure in the acquisition and development of land and power generating facilities, etc., along with fluctuations in weather, climate and the natural environment.

As a general rule and unless indicated otherwise, consolidated figures are used for the monetary amounts listed in this document. As amounts less than one million yen are rounded off, totals in each column may not match.

I. Financial Results for 2Q, the Fiscal Year Ending March 2025 (IFRS)

1

Concluded a virtual PPA*¹ for Non-FIT Solar PV (max. 36 MW) with domestic consumer in October 2024.

2

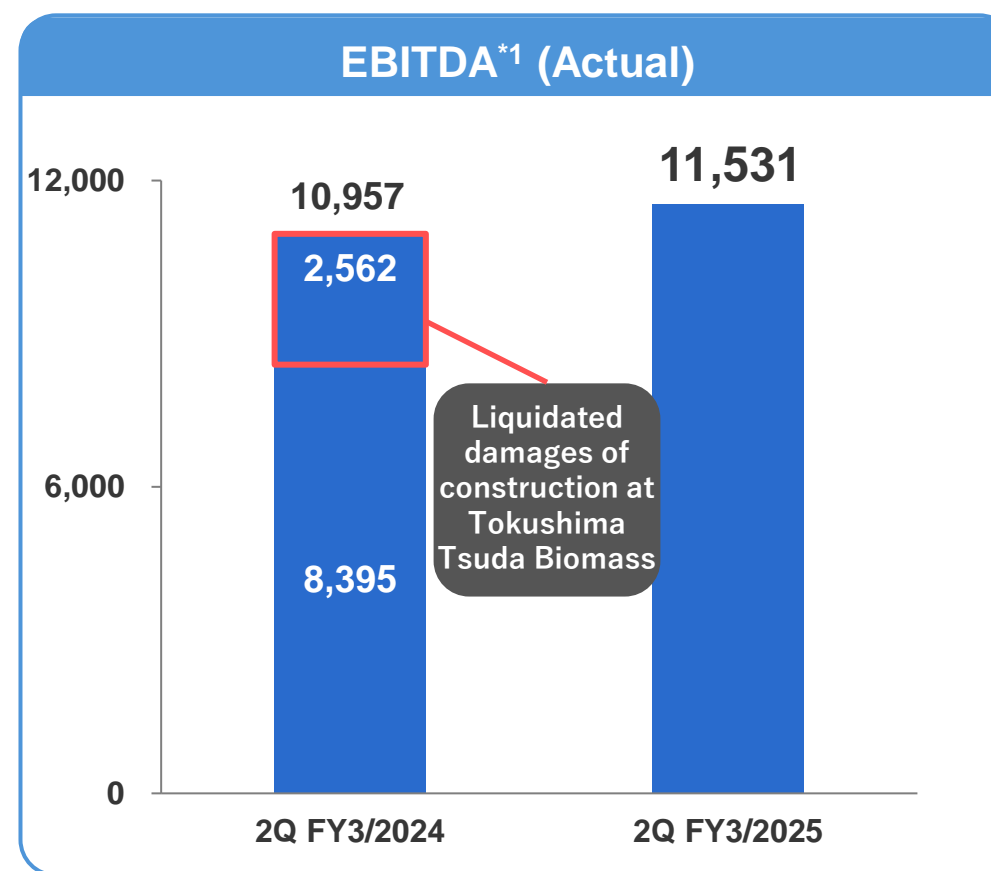

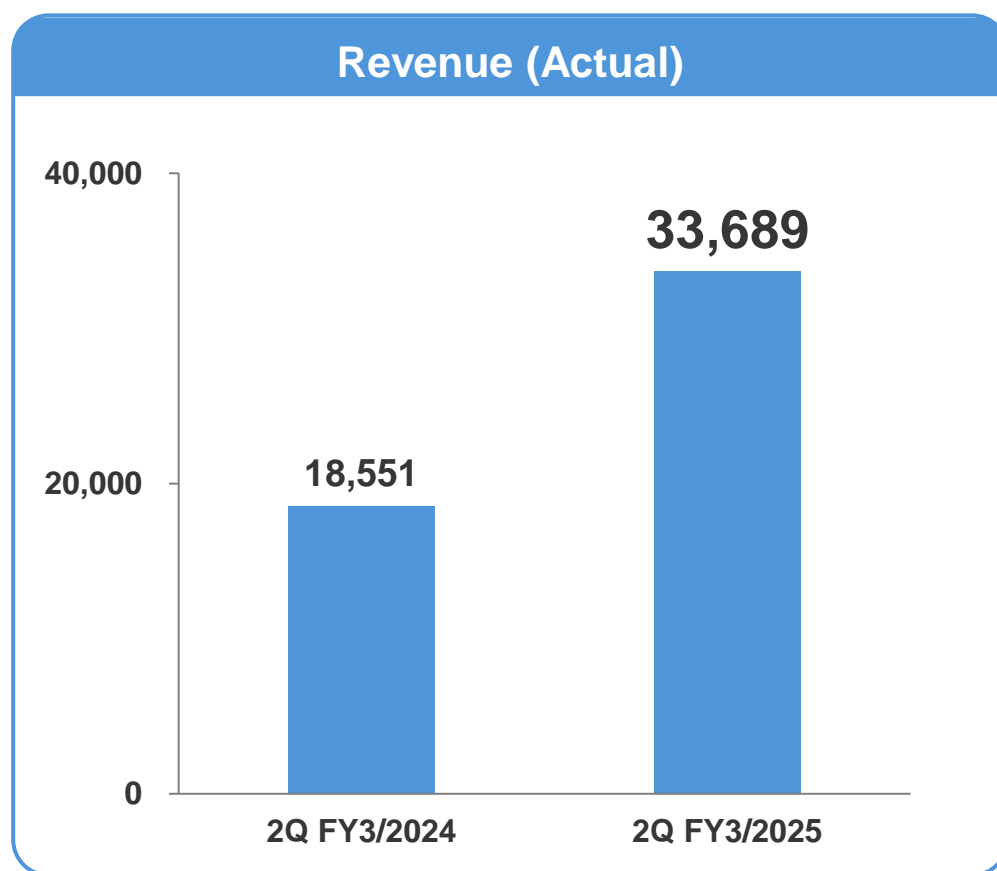

The applying capacity of Non-FIT Solar PV business for electricity quantity adjustment service has expanded to total 106MW (as of end of October 2024).

3

Preparations for final investment decision are progressing for Storage Battery projects (total 215MW) awarded in the Long-term Decarbonization Power Source Auction.

- Revenue increased compared to the first half of the previous year due to stable operation of Sendai-Gamo Biomass and Ishinomaki Hibarino Biomass, which reached COD in the second half of last fiscal year.
- EBITDA remained almost flat due to approx. three-month repair work at Tokushima-Tsuda Biomass and liquidated damages of approx. 2.6 billion yen accrued in the first half of the last fiscal year.

(Unit: Million yen)

*1 EBITDA= Revenue - Fuel expenses - Outsourcing expenses - Payroll and related personnel expenses + Share of profit (loss) of investments accounted for using the equity method + Other income and expenses. EBITDA is subject to neither audit nor quarterly review.

- Profits below EBITDA decreased due to depreciation (approx. 1.7 billion yen) and other expenses such as interest payments fully incurred while the limited operational period of approx. three months at Tokushima-Tsuda Biomass, and the liquidated damages (approx. 2.6 billion yen) recorded in the first half of last fiscal year.
- Progress in a profit attributable to the owners of the parent has been almost on track to achieve our original forecast as it is expected to recognize a gain on the step acquisitions and business development fees in the 2nd half of this fiscal year.

(Unit: Million yen)	2Q FY3/2024	2Q FY3/2025	FY3/2025 (Forecast)	Full-year Change
Revenue	18,551	33,699	71,800	46.8%
EBITDA*1	10,957	11,531	20,800	55.4%
EBITDA margin	59.1%	34.2%	29.0%	-
Operating profit	6,233	2,152	1,000	215.2%
Profit attributable to owners of the parent	2,818	-128	5,900	-2.2%
EPS (yen)*2	35.77	-1.43	65.31	-
LTM ROE*3	1.2%	8.1%	7.0%	-
Capacity (MW)*4	594.3	873.6	1,187.2	-

*1 EBITDA= Revenue - Fuel expenses - Outsourcing expenses - Payroll and related personnel expenses + Share of profit (loss) of investments accounted for using the equity method + Other income and expenses. EBITDA is subject to neither audit nor quarterly review. *2 The EPS value does not consider adjustment for dilutive shares.

*3 For the purpose of calculating ROE, the profit figure for the last 12-month period is used, and the equity figure used is the simple average of the values at the beginning and the end of the last 12-month period.

*4 The capacity figures represent gross generation capacity. Non-FIT solar projects record installed capacity on a completion basis.

- Large Solar PV Business recorded stable revenue and profits.
- In Biomass Power Generation Business, although Sendai-Gamo Biomass and Ishinomaki Hibarino Biomass made a full contribution, profits below EBITDA were affected by the suspension of operations associated with the repair work at Tokushima-Tsuda Biomass. In the same period of the previous fiscal year, liquidated damages at Tokushima-Tsuda Biomass (approx. 2.6 billion yen) was recorded.

*1 EBITDA= Revenue - Fuel expenses - Outsourcing expenses - Payroll and related personnel expenses + Share of profit (loss) of investments accounted for using the equity method + Other income and expenses. EBITDA is neither subject to audit nor quarterly review.

- Large Solar PV Business recorded stable revenue and profits with seasonality.
- The Biomass Power Generation Business was affected by approx. 3 months repair work at Tokushima-Tsuda Biomass in 1Q of FY3/2025.
- In every year, 4Q is negatively affected by the lump-sum recording of property taxes (FY2024 Q4 results: 736 million yen for Solar PV and 122.1 million yen for Biomass).

II. Recent Investors' Interests

Status of Permanent Improvement Installation at Tokushima-Tsuda Biomass	<ul style="list-style-type: none">■ Operational from end of July 2024 to late Sep. 2024. Permanent Improvement Installation to prevent pipe thinning is underway from late Sep. to late Dec 2024.■ Incorporated in full year outlook of this fiscal year.
Commissioning status of Omaezakikou Biomass	<ul style="list-style-type: none">■ A malfunction in the turbine piping was identified, and the piping is under realignment. The boiler is planned to be restarted in January 2025, and the remaining trial operation process will be performed with COD schedule of March 2025.■ The consolidation is scheduled in March 2025.
Commissioning status of Karatsu Biomass	<ul style="list-style-type: none">■ A malfunction in the turbine piping was identified during the trial operation, and the piping is under realignment. The boiler is planned to be started in November 2024, and the trial operation process will be performed with COD schedule of March 2025.■ The consolidation scheduled for March 2025, as initially assumptions.
Recent Trends in Spot Fuel Prices (CIF)	<ul style="list-style-type: none">■ Wood pellets: \$160 – 170/t, lower than our assumption for financial forecast (\$190/t).■ Certified PKS: \$120 – 130/t, substantially lower than our assumption for financial forecast (\$180/t).

- Since this May, the trend spot prices for biomass fuels have remained soft. Certified PKS price has notably declined since the beginning of this fiscal year.

(Unit: USD/t)

*1 The data is for reference only. Data source: Argus. Wood pellets (USA) is "Wood pellets export price USA southeast fob" Uncertified PKS is "Palm kernel shell (PKS) Index east coast Sumatra fob". Certified PKS is "Fob east coast Sumatra".
 Unauthorized reproduction or use of this data is strictly prohibited.

- The impact of interest rate and exchange rate fluctuations on the Company financials and its business is currently minimal.

Interest Rate Fluctuations

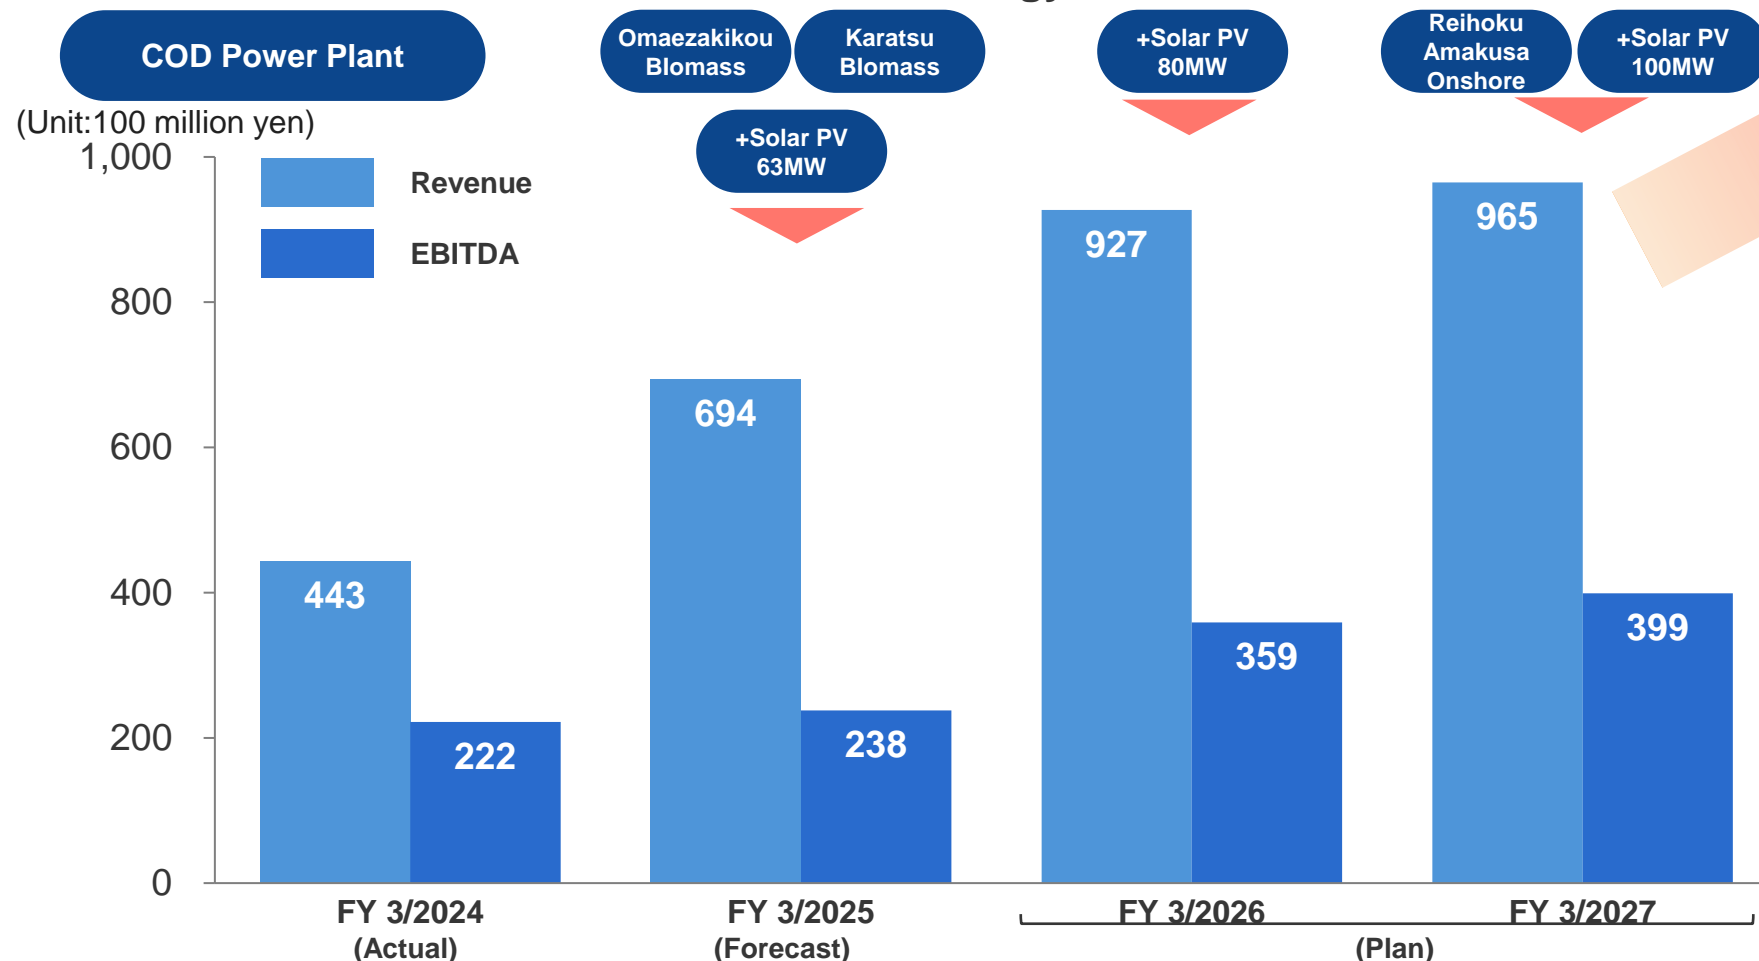

- Out of total interest-bearing debt of 293.6 billion yen, approx. 19.7 billion yen has exposure to interest rate fluctuations.
 - Most of these debts are bank borrowings and are affected by changes in the reference interest rate of yen such as Tibor, etc.
 - Approx. 244.3 billion yen of project finance, interest rates have been fixed through interest rate swaps in principle.
 - 14 billion yen of green bonds issued are fixed rate.

Exchange Rate Fluctuations

- The exchange rate (\$/yen) for fuel procurement in the biomass business has been mostly hedged and the impact is minimal.
 - Increase in fuel prices is unhedged.
- Fair value evaluation of US dollar-denominated liabilities in the Quang Tri onshore wind (approx. US \$149 million) due to exchange rate fluctuations to Vietnamese dong is recorded in PL for 40% equity interest under IFRS. (A weak dollar means unrealized gains.)

- Foreseeable growth and establishment of solid revenue base by contributions from biomass and onshore wind projects under construction as well as the expansion of Non-FIT Solar PV projects.
- The following does not include projects under development, and further profit increases are expected upon the realization of these projects.

<Revenue and EBITDA of the Renewable Energy Power Generation Business*1>

- < Major Assumptions >
(Consolidated)
- Large-scale Solar (FIT): 12 locations
 - Biomass: 7 locations
 - Exchange Rate: 150 yen/USD (From fiscal year 2025 onwards)
 - Spot Fuel Prices
 - Wood Pellets: \$170/ton (From fiscal year 2025 onwards)
 - Certified PKS: \$125/ton (From fiscal year 2025 onwards)
 - Onshore Wind: 1 location
 - Non-FIT Solar

*1 The scheduled start dates for the operation of ongoing construction projects are current estimates and may be subject to change or delay.

III. Outlook for the Fiscal Year Ending March 2025 (IFRS)

- Revenue expects the full year contribution of the biomass power plants which started operation in the previous fiscal year and the COD of Omaezakikou Biomass.
- The consolidation of Omaezakikou Biomass and Karatsu Biomass is expected to result in the recognition of a gain on the step acquisitions.

(Unit: Million yen / %)	FY3/2024 (Actual)	FY3/2025 (Forecast)	Change
Revenue	44,748	71,800	60.5%
EBITDA*1	16,712	20,800	24.5%
EBITDA margin	37.3%	29.0%	-
Operating profit	5,017	1,000	-80.1%

EPS (yen)*2	112.32	65.31	-
LTM ROE*3	16.0%	7.0%	-
Capacity (MW)*4	852.3	1,187.2	

- Full-year contribution of biomass started in the previous fiscal year (Sendai-Gamo, Ishinomaki Hibarino)
- Business development fee is expected to be recognized.
- A gain on the step acquisitions is expected to be recognized, associated with consolidation of Omaezakikou Biomass and Karatsu Biomass.

*1 EBITDA= Revenue - Fuel expenses - Outsourcing expenses - Payroll and related personnel expenses + Share of profit (loss) of investments accounted for using the equity method + Other income and expenses. EBITDA is neither subject to audit nor quarterly review. *2 EPS figures represents basic EPS. EPS for FY3/2025 has been calculated assuming that the total number of issued shares will remain unchanged from the total number of issued shares at the end of FY3/2024. *3 For the purpose of calculating ROE, the profit figure for the most recent 12-month period is used, and the equity figure used is the simple average of the values at the beginning of the most recent 12-month period and at the end of the most recent month period. *4 The capacity figures represent gross generation capacity.

- Solar power generation business expects full-year contribution of Hitoyoshi Solar.
- The biomass power generation business expects full-year contribution of Sendai Gamo Biomass and Ishinomaki Hibarino Biomass.
- The repair work of Tokushima-Tsuda Biomass was completed in July.
The permanent construction work is scheduled to be carried out from late Sep. to late Dec..
- Assumption of spot fuel prices: Wood Pellet 190 \$/ t, Certified PKS 180 \$/ t

(Unit: Million yen / %)		FY3/2024 (Actual)	FY3/2025 (Forecast)	Change

**1 EBITDA= Revenue - Fuel expenses - Outsourcing expenses - Payroll and related personnel expenses + Share of profit (loss) of investments accounted for using the equity method + Other income and expenses. EBITDA is neither subject to audit nor quarterly review.

- The Renewable Energy Power Generation Business expects increase in Revenue and EBITDA, but Operating Profit is expected to decrease primarily due to higher fuel price and longer inspection/repair work at Tokushima-Tsuda Biomass.
- The Renewable Energy Development and Operation Business expects business development fees and similar level of development costs with the previous fiscal year.

^{*1} When receiving Business development fees from affiliated companies, RENOVA records such development fees in its consolidated financial results after deducting amounts that correspond to RENOVA's ownership stake in those affiliated companies. ^{*2} EBITDA= Revenue - Fuel expenses - Outsourcing expenses - Payroll and related personnel expenses + Share of profit (loss) of investments accounted for using the equity method + Other income and expenses. EBITDA is neither subject to audit nor quarterly review. ^{*3} EBITDA for the renewable energy development and operation business segment is the amount including dividends received and is different from the amount stated in the segment notes in the consolidated financial statements.

FY3/2024(Actual)

FY3/2025(Forecast)

Renewable Energy Power Generation Business

Consolidated Subsidiaries

- 12 Solar PV plants / 352.8 MW
 - Forecasts for some existing Solar PV plants incorporate additional output curtailment
- Non-FIT PPA(Solar PV / Total 11.6 MW)
- 4 Biomass plants / 320.3MW
 - Contributions to revenue from commissioning and Liquidated Damages of Tokushima-Tsuda Biomass
 - Includes allowance for unplanned operational downtime

Income from equity in affiliates

- 1 Onshore wind / 144.0MW
 - Quang Tri Onshore Wind

Consolidated Subsidiaries

- 12 Solar PV plants / 352.8MW
 - Forecasts for some existing Solar PV plants incorporate additional output curtailment
- Non-FIT PPA (Solar PV plants) / Total Appx. 74 MW
- 6 Biomass plants / 445.2MW
 - The repair work of Tokushima-Tsuda was completed in July. The construction work for permanent countermeasure is scheduled from late Sep. to late Dec.
 - COD and consolidation of Omaezakikou in March 2025.
 - COD and consolidation of Karatsu in March 2025.
 - Higher fuel prices are considered to continue in fuel expenses

Income from equity in affiliates

- 1 Onshore wind / 144.0MW / Quang Tri Onshore Wind
- Biomass plants / Revenue from commissioning at each plant
- 1 Geothermal plant / 2.0MW / Minami-Aso Yunotani

Renewable Energy Development and Operation

Business Development Fee

- Not recorded

Others

- Final development costs were less than initial allocations

Business Development Fee

- Expect to record about JPY1.5 billion from several projects- (After consolidation elimination)

Others

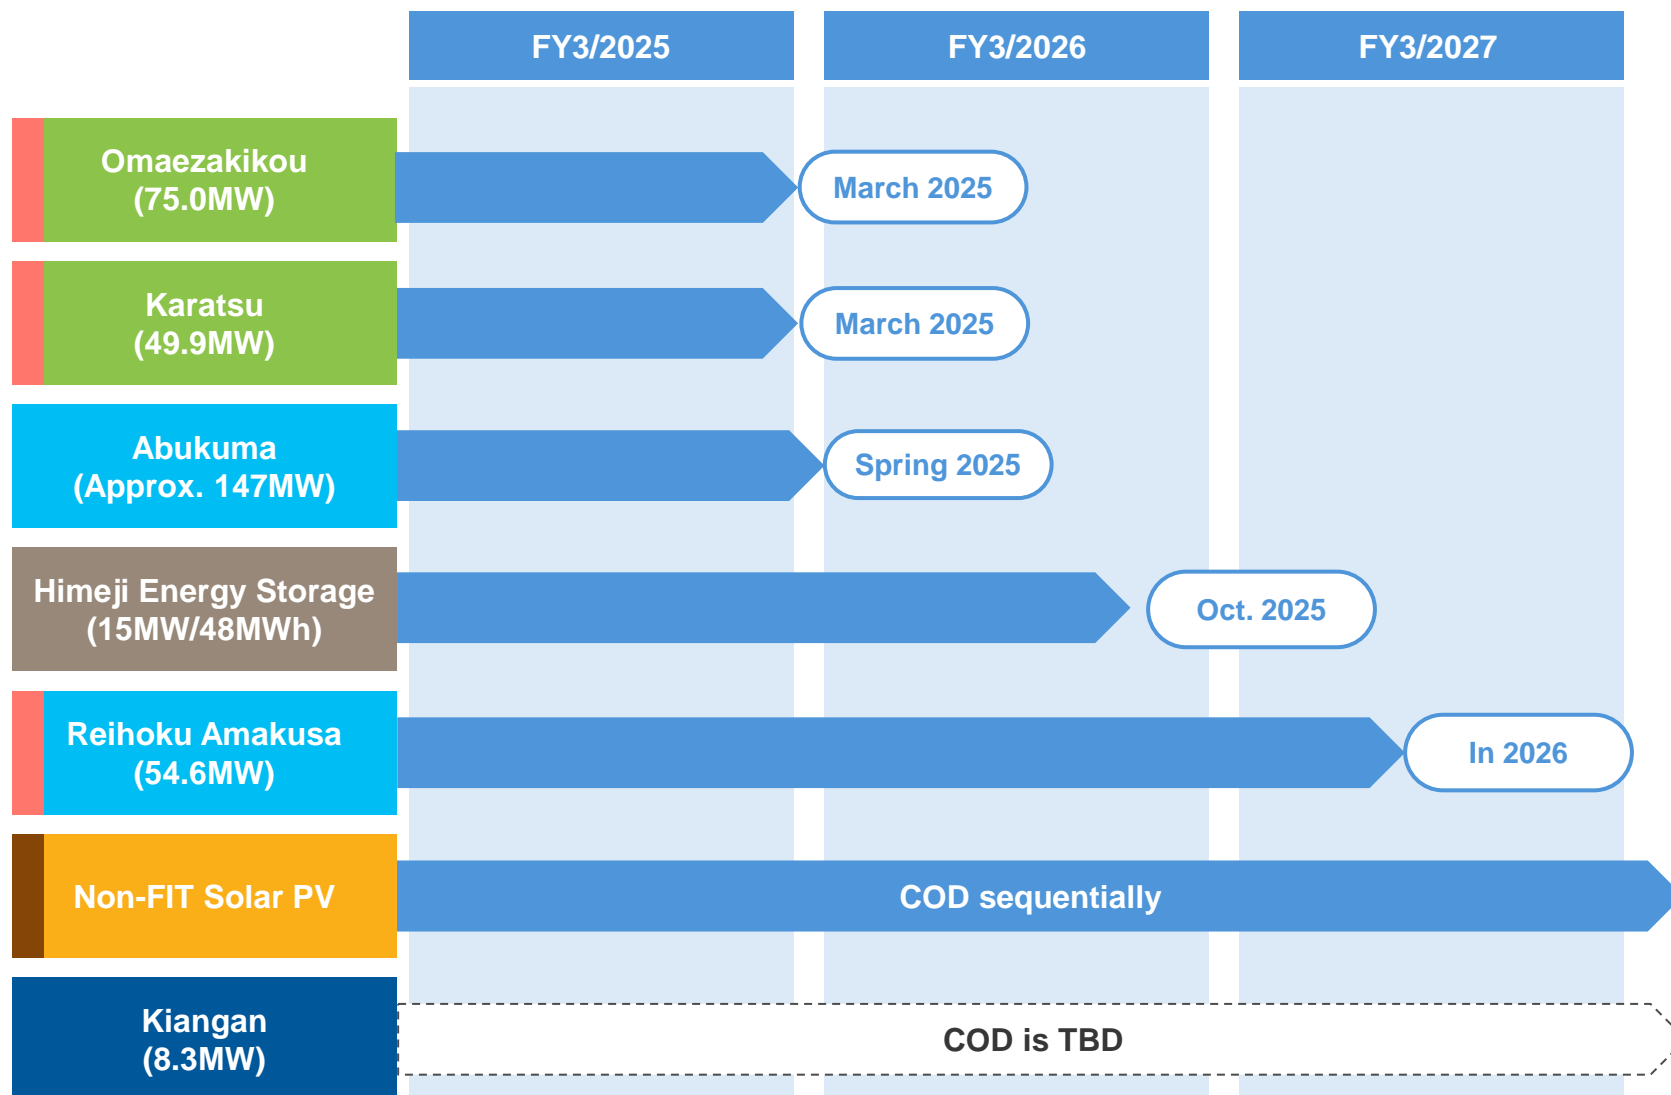

- Development costs are expected to be similar level as previous fiscal year

*1 Business Development Fee is the figure after elimination of the consolidation

IV. Update on Project Development

- Proceeding towards the start of operation on multiple projects.

- Biomass
- Onshore Wind
- Energy Storage
- Solar PV
- hydroelectric

- Scheduled for consolidation after COD
- ...Consolidated

COD (Planned)

*1 Projects under construction may be altered, delayed or cancelled. Projects for which work has commenced in accordance with the EPC contract are shown as “under construction”.

*2 The COD of Kiangan hydroelectric (8.3MW), which started construction in August 2021, has not been publicly disclosed.

- Omaezakikou Biomass is scheduled to COD in March 2026.
- Karatsu Biomass is scheduled to COD in March 2026.
- Reihoku Amakusa Onshore Wind are progressing with the construction of wind turbine yards and other related works in preparation for the wind turbine foundation construction.

*1 Purchase price is not the actual contractual price agreed with the party that purchases the electricity, but the fixed purchase price (displayed without consumption tax) applied based on the FIT Scheme for each power generation facility.

*2 Since the grid connection contract was concluded on or after August 1, 2016 and there is a 3-year start-up period from certification, the selling period under the FIT is expected to be 18 years and 9 months.

- COD of total 63 MW is expected this fiscal year. In the 2nd quarter of this fiscal year, 9.5MW were newly completed, bringing the total COD capacity of the Non-FIT Solar PV business to 32.9 MW.
